

Ognjen Bostjancic

Software Engineer

Software engineer focused on observability, developer tools, and full-stack product engineering. At Sentry, I work on AI agent monitoring and debugging workflows using TypeScript, React, Python, and Django.

Experience

Jan. 2026 - Present

Senior Software Engineer II Sentry, Vienna

Work on Sentry's Telemetry Experience team, building observability for AI agents and agent-driven systems. Own product features across backend and frontend, helping developers understand tool calls, failures, latency, and full-session behavior.

May. 2023 - Jan. 2026

Senior Software Engineer Sentry, Vienna

Worked on Sentry's Metrics product, along with various parts of the broader product. Shipped customer-facing, end-to-end features across backend and frontend systems using Django, React, and TypeScript.

Apr. 2022 - May. 2023

Freelance Software Engineer Toptal, Remote

Delivered web application features as a freelance software engineer using Node.js, React, and TypeScript. Joined remote engineering teams and focused on shipping maintainable product features.

Feb. 2022 - Apr. 2023

Software Engineer Bitmovin GmbH, Vienna

Developed and maintained multiple codebases used to orchestrate automated testing of a video player across a range of devices. Helped reduce complexity in a growing test orchestration system used across multiple device targets.

Feb. 2020 - Feb. 2022

Web Developer Anyline GmbH, Vienna

Took ownership of an internal IDE used to develop OCR products. Also worked on multiple microservices inside the cloud-based ecosystem, along with their frontend clients.

May. 2018 - Jan. 2020

Backend Web Developer Workflow EDV, Vienna

Starting out as an intern, I transitioned into a developer position. I developed a new REST API as part of the existing codebase using the Spring framework.

May. 2017 - Apr. 2018

Web Developer IT Services of University of Sarajevo, Sarajevo

Developed a REST API backend for the new student management system. I worked mostly with Java and Spring.

Education

Oct. 2017 - Coursework completed

MA of Computer Science (MSc. equivalent) Faculty of Natural Sciences and Mathematics, Sarajevo

Coursework completed. Notable courses: Computer Geometry and Graphics, Computability Theory, Software Engineering, Artificial Intelligence.

Oct. 2014 - Sep. 2017

BA of Computer Science (BSc. equivalent) Faculty of Natural Sciences and Mathematics, Sarajevo

Notable courses: Object-Oriented Programming, Data Structures, Algorithm Analysis, Computer Networking, Probability Theory.

Core Strengths

- Observability products
- AI agent monitoring
- Developer tooling
- End-to-end feature delivery
- Product-minded engineering
- Debugging workflows

Engineering

- AI agents and MCP instrumentation
- Telemetry, metrics, traces, alerts
- APIs and data modeling
- End-to-end web applications
- TypeScript, React, Node.js
- Python, Django
- CI/CD and production operations

Tools & Practices

- Git and GitHub Actions
- Docker
- PostgreSQL and SQL
- Frontend and backend architecture
- Code review and mentoring

Languages

- English (Fluent)
- German (Conversational)
- Bosnian (Native)

Projects

Kolorkross

A VS Code extension that allows you to organize and access your projects in a color-coded way.
