Experience

Sentry, Vienna

Senior Software Engineer II

Jan. 2026 - Present

Building observability for AI agents and agent-driven systems on Sentry's Telemetry Experience team. Owning product features across backend and frontend that help developers understand tool calls, failures, latency, and full-session behavior.

Senior Software Engineer

May. 2023 - Jan. 2026

Developed features for Sentry's Metrics product and other parts of the platform. Shipped customer-facing, end-to-end features across backend and frontend systems using Django, React, and TypeScript.

Toptal, Remote

Freelance Software Engineer

Apr. 2022 - May. 2023

Delivered web application features for remote engineering teams using Node.js, React, and TypeScript. Focused on shipping maintainable product features.

Bitmovin GmbH, Vienna

Software Engineer

Feb. 2022 - Apr. 2023

Developed and maintained codebases for automated video player testing across multiple device targets. Helped reduce complexity in the test orchestration system.

Anyline GmbH, Vienna

Web Developer

Feb. 2020 - Feb. 2022

Owned an internal IDE for developing OCR products. Worked on microservices and their frontend clients within a cloud-based ecosystem.

Workflow EDV, Vienna

Backend Web Developer

May. 2018 - Jan. 2020

Progressed from intern to developer. Developed a new REST API within the existing codebase using Spring.

IT Services of University of Sarajevo, Sarajevo

Web Developer

May. 2017 - Apr. 2018

Developed a REST API backend for a new student management system using Java and Spring.

Education

Faculty of Natural Sciences and Mathematics, Sarajevo

MA of Computer Science (MSc. equivalent)

Oct. 2017 - Coursework completed

Coursework completed. Notable courses: Artificial Intelligence, Software Engineering, Computer Geometry and Graphics, Computability Theory.

Faculty of Natural Sciences and Mathematics, Sarajevo

BA of Computer Science (BSc. equivalent)

Oct. 2014 - Sep. 2017

Notable courses: Algorithm Analysis, Data Structures, Object-Oriented Programming, Computer Networking, Probability Theory.

Core Strengths

- AI agent monitoring
- Software engineering
- Observability products
- Developer tooling
- End-to-end feature delivery
- Product-minded engineering
- Debugging workflows

Engineering

- AI agents and MCP instrumentation
- Telemetry, metrics, traces, alerts
- APIs and data modeling
- End-to-end web applications
- TypeScript, React, Node.js
- Python, Django
- CI/CD and production operations

Tools & Practices

- Git and GitHub Actions
- Docker
- PostgreSQL and SQL
- Frontend and backend architecture
- Code review and mentoring

Languages

- English (Fluent)
- German (Conversational)
- Bosnian (Native)

Projects

Kolorkross

VS Code extension for organizing and accessing projects by color.
